Mosaique

An array of pixel-like squares adorns this expansive and flexible collection of rugs by Belgian designer Alain Gilles. Made in circular and rectangular formats, they are conceived to easily layer together for graphic combinations. yoyo-designs.com

Petit

Though it made its debut in the interior of Paris's Papi restaurant last year, the Petit chair by Neri&Hu officially launched this spring. Its streamlined design is available with three or four legs, as well as multiple upholstery and frame options, including the Fjord-painted ash shown. delaespada.com

Plot

GamFratesi's latest product for Poltrona Frau is a versatile range of two-, three- and four-panel room dividers named Plot. Framed in veneered aluminum tubing, the movable partition weaves together horizontal and vertical bands of leather to create a square (shown) or circular motif. Brass joints and feet add well-considered detail. poltronafrau.com
