Nynke Tynagel's drawings are now also for sale as wallpaper.

In the clouds

After twenty years of Studio Job, designer Nynke Tynagel has continued under her own name. And ever since then, she's been doing exactly what she loves most: drawing non-stop. In the new wallpaper collection Elements, which she designed for wallpaper brand YO2, we see the clear black line, which also characterized many of her patterns for Studio Job. The new collection flawlessly reflects the changing weather of our country.

For Elements/Air Tynagel was inspired by the Dutch cloudy skies, as many famous Dutch painters did before her. A watery sun shines through the clouds, as well as some mundane yet strange objects, such as a make-up brush and a slice of pie. Elements/-Earth shows a cornfield full of poppies, giving you a wonderfully carefree feeling until you discover the stray matchbox. — **Elsbeth Grievink**
